(54) Title: CONCEALED TOILET CLEANING SYSTEM

(57) Abstract: The present invention relates to a system for concealing a cleaning device such as a toilet plunger within a toilet flush tank. A modified toilet plunger has been designed to include a hinge so that the plunger cup can pivot on the end of the plunger handle, thereby taking up less space. The folded toilet plunger is secured to the inside of the toilet flush tank by a holder, preferably on the toilet flush tank cover, so that the toilet plunger is readily accessible yet out of sight and will drain into the toilet flush tank after use.
